

Product Information Sheet

Indication For Use: an adjustable - boil & fit style oral appliance designed to reduce or eliminate snoring and obstructive sleep apnea. The Silencer[®] Custom provides an ideal solution that may be promoted to both patients and referral sources when the affordability of therapy becomes a problem. For some patients it may represent their only avenue to therapy, for others it may simply be a trial step on the way to the purchase of a more expensive long term laboratory fabricated oral appliance, or for CPAP patients it may offer relief when worn in combination with their CPAP device.

Product Features:

- The Silencer[®] Custom delivers a medium term and affordable therapy option for patients suffering from snoring and/or sleep apnea.
- Fabricated and fit for the patient in a simple boil & fit technique.
- Patented design combines up three advancement positions with our Brux-Slide™ lateral movement delivering a comfortable patient experience and device durability.
- Two lower arch trays allowing a transition to additional advancement if required.
- Design simplicity provides patients with an easy to use device.
- Warranted for six months.
