

the SILENCER[®]

Trial - ST1000 TM

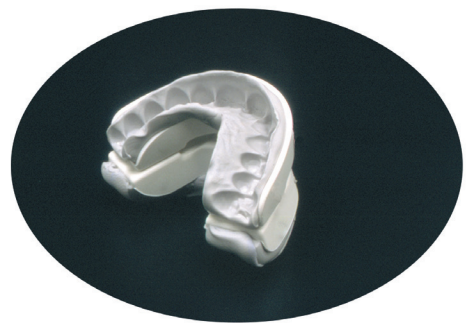

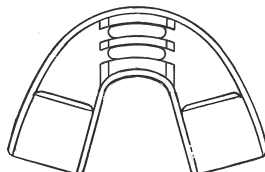

PRODUCT INFORMATION SHEET

Indication for Use:

Trial device intended to assess airway response to oral appliance therapy for the treatment of Snoring and Sleep Apnea.

Features:

- The Silencer[®] Trial offers the patient and provider the opportunity to perform an inexpensive oral appliance trial (*14 days*) prior to initiating long term therapy.
- May be adjusted easily within a sleep laboratory or home testing setting to easily assess the affect of madibular advancement on the airway.
- It is fit to the patient in a quick and easy chair side fitting technique. No boiling water required. Tray is simply filled with a heavy body impression material (not included with product).
- Patented design combines advancement and lateral movement.
- This device is a great practice builder when communicating with referral sources who wish to replicate the "CPAP Trial" experience using
- \$24 Per Device
- \$19.20 Clinic Pack (10 Devices)
